ABOUT :

I'm a college student passionate about technology and problem-solving, currently exploring the field of data science and development. I have experience with Python, machine learning, SQL, and data analysis, along with a solid understanding of algorithms and statistics. I'm a fast learner and excited about opportunities to contribute to real-world projects while growing my skills in a dynamic, product-driven environment

EDUCATION

B.Tech in AI & Data Science :

B.S. Abdur Rahman Crescent Institute of Science and Technology

2024 - 2027 | Chennai, Tamil Nadu, India. CGPA : 7.00

Hindu Higher Secondary School (PCM WITH CS) :

2021 - 2023 | Watrap, Tamil Nadu, India. 12th : 76%

PROJECTS

Student Management(CRUD) - Built using Python and SQL

- Developed a student management system that enables Create, Read, Update, and Delete (CRUD) operations, streamlining the management of student data using Python and SQL.
- Integrated database functionality to store and retrieve student records efficiently, showcasing skills in backend development and data manipulation.

PUF-BASED AUTHENTICATION SYSTEM

- Developed a secure authentication system leveraging Physical Unclonable Functions (PUFs) to provide tamper-resistant and unique device verification.
- Explored real-world applications, including IoT security and financial transaction protection, showcasing innovation in hardware-based cybersecurity.

SKILLS

Python Programming

Web Development

Machine learning

SQL Programming

Statistics and mathematics

Data Analysis and Visualization

DSA

LANGUAGES

ENGLISH ,TAMIL

SOFT SKILLS

Problem Solving Skill

Fast Learner

Problem-Solving and Analytical Thinking

Team Collaboration and Communication

Adaptability and Time Management
